IMPORTANT INFORMATION
ABOUT YOUR DRINKING WATER
HILLCREST MANOR WATER USERS ASSOCIATION NV0000145

TIER 3: TECHNICAL / MANAGERIAL / FINANCIAL CAPABILITY ISSUE

What Happened?

Our water system is required to monitor your drinking water for specific analytes on a regular basis. Results of regular monitoring grade our drinking water versus health standards.

Our water system violated at least one drinking water standard by not reporting to regulatory agencies a sample result within the allotted time frame.

Although this is not an emergency, as our customers, you have a right to know what happened and what is being done to correct this situation.

Table 1, analytes which were not reported on time.

Contaminant	Date	Health Effect
E. Coli	2/1/2023 – 2/28/2023	Coliforms are bacteria that are naturally present in the environment and are used as an indicator that other, potentially-harmful, bacteria may be present. Coliforms were found in more samples than allowed and this was a warning of potential problems.

Additional information:
https://www.epa.gov/dwstandardsregulations/secondary-drinking-water-standards-guidance-nuisance-chemicals

What Is Being Done?

This sample has been taken, reported to the state and recorded for compliance. Going forward, all total coliform samples are sent to the correct regulatory agencies within the proper time frame.

What Should I Do?

This is not an immediate health risk. If it had been, you would have been notified immediately. However, if you have specific health concerns, consult your doctor.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (e.g. disabled neighbors, children). You can do this by posting this notice in a public place or distributing copies by hand or mail.
